

Security Assessments || Penetration Testing || Compliance Audits || Incident Response || Internet of Things & Cloud Security

“Recent events underscore the need to accelerate the administration’s cyber strategy and confront aggressive, persistent malicious actors that continue to target our nation’s cyber infrastructure.” - White House OMB

VULNERABILITY SCANNING AND MONITORING

Scanning and ongoing monitoring for vulnerabilities in your IT infrastructure, applications and databases is a core component of maintaining your security posture. We provide a variety of scanning and monitoring solutions, including our own affordable CyberSecure™ line of tools.

COMPLIANCE, ADVISORY AND TRAINING

For PCI, HIPAA/HITECH and beyond, we provide compliance certification and advisory services based on decades of expertise. We also offer policy guidance for implementing a world-class security program and advanced staff training to ensure every employee knows their responsibilities.

PENETRATION TESTING & INCIDENT RESPONSE

Our certified personnel are carefully vetted to ensure our penetration testing solutions are best-of-breed. We can expertly probe your systems and defenses. We also offer incident response and remediation solutions including forensic investigation support for victims of an attack

INTERNET OF THINGS AND CLOUD SECURITY

As the number of internet-connected devices grows exponentially, so too does the frequency of attacks. We specialize in sensor, SCADA and cloud computing security to ensure your field-based, grid and mobile devices, as well as the infrastructure that supports them, are safe and secure.

Netizen is security-cleared, certified and trusted by clients ranging from federal agencies to businesses of all sizes. Learn more at www.NetizenCorp.com or email Team@NetizenCorp.com.
